## Hello and Welcome to Vanywhere

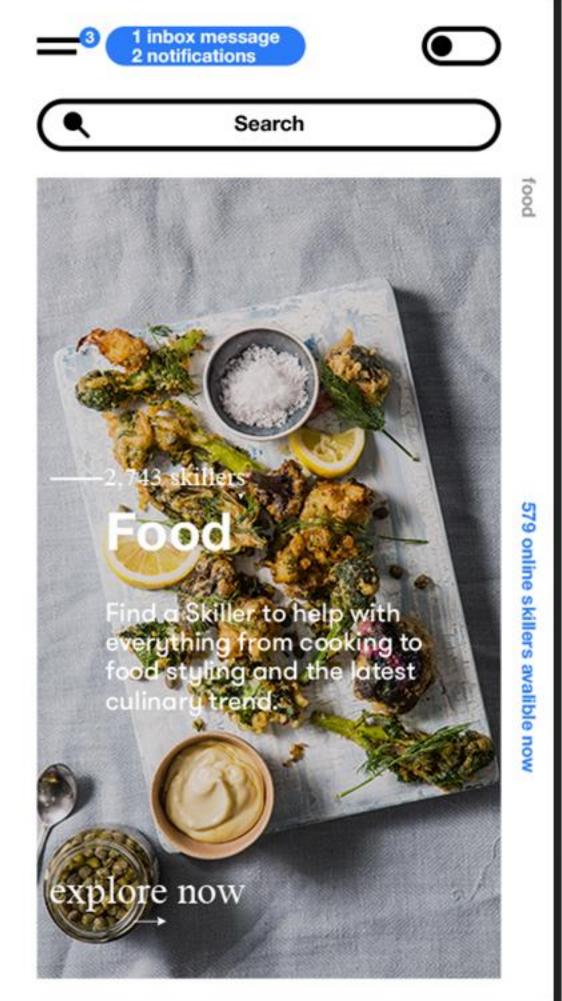

Experience. Live. Personalized. Advice.

Founded in 2015, Vanywhere's platform is operational and has been used and tested by users. The company has raised equity seed round, and participated in the CrossRider Innovation Accelerator.

### Vanywhere is a skill-sharing platform.

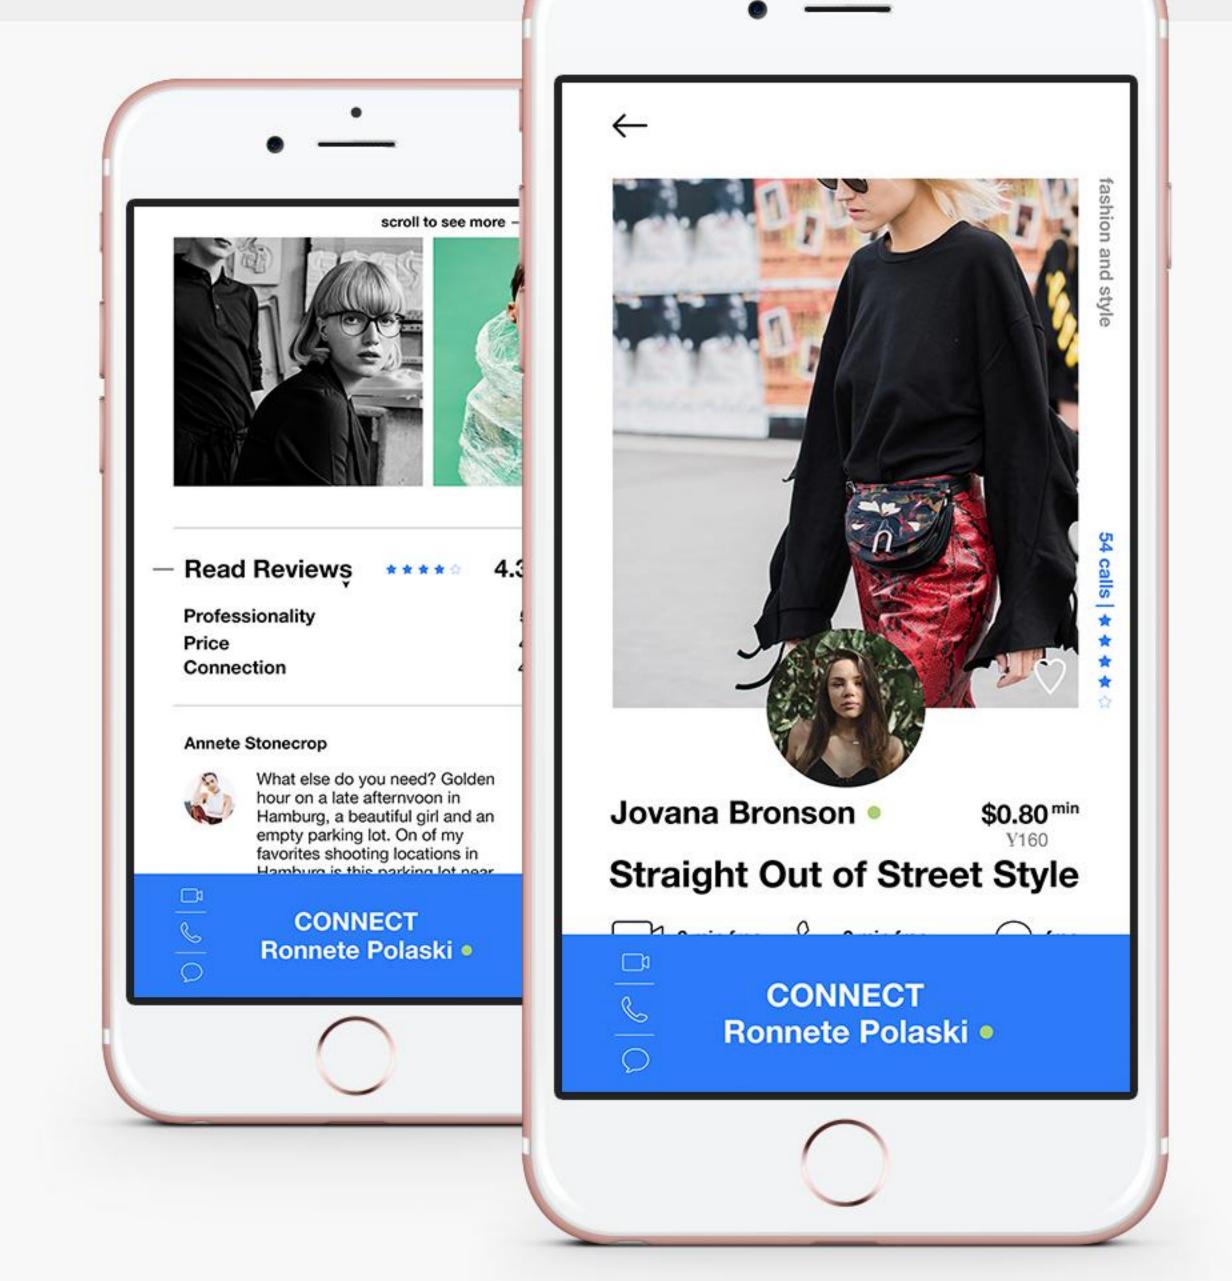

We connect people seeking and offering live services and personalized solutions.

# Our platform is based on people with skills.

We call them Skillers. A Skiller doesn't necessarily need to be an expert or a professional. They just need to have a skill that they're passionate about and eager to share.

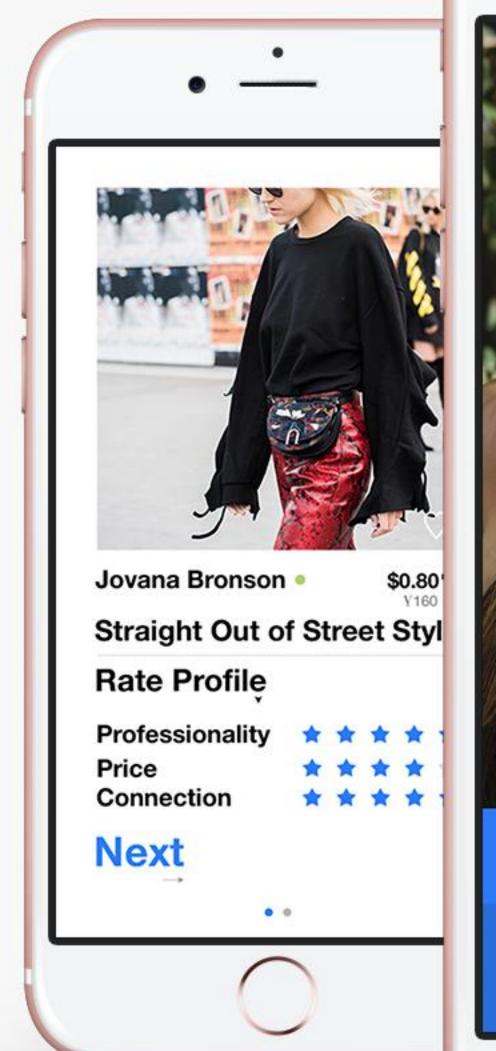

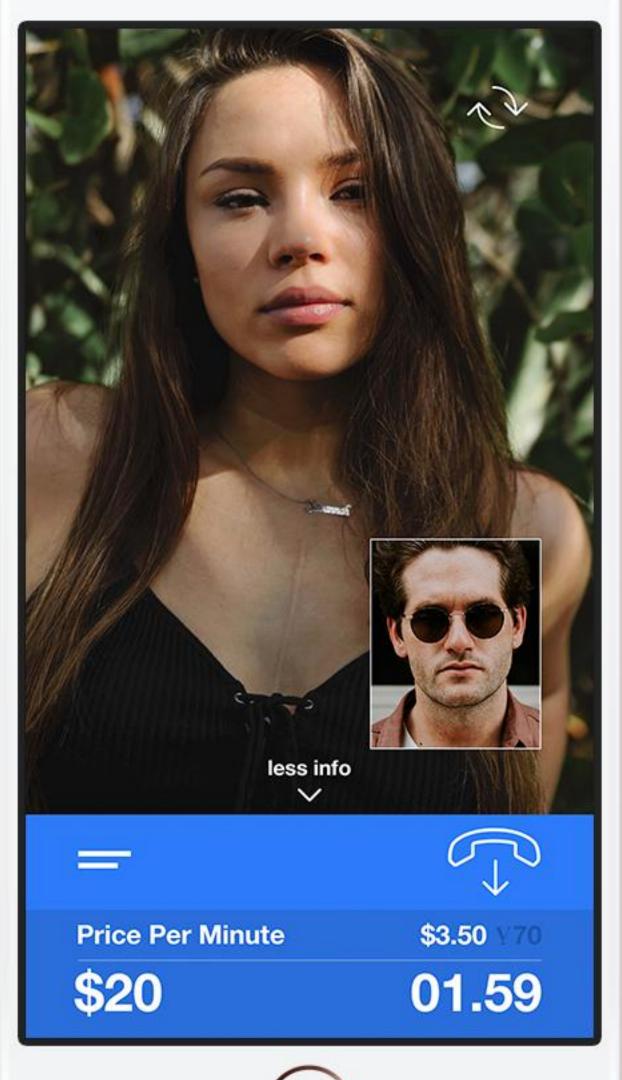

#### Users connect 1-on-1 with Skillers.

Vanywhere offers live conversations via video, voice and chat. The result is a personalized experience tailored to each user's specific needs.

### Creating a decentralized marketplace.

All connections happen on a peer-to-peer basis. Transactions are based on the VANY token.

Voice call

- Message

--- Gigs

### Vanywhere solves three market problems.

- Expand the skill-sharing economy to include a wider community of people.
- Reduced commisions
- Provide live, instant interactions that don't exist today.

### Apple Case Study

In January 2017, we ran a pilot to test Vanywhere. Every month, there are over 1M Google search requests for Apple tech support questions such as "how to synch my iPhone." We saw an opportunity to turn Apple enthusiasts into Skillers and launched a Vanywhere Apple support campaign.

#### **Qtum Blockchain**

As part of the new economy, Vanywhere has embraced Qtum blockchain technology and is bringing cryptocurrency to a mainstream marketplace with its QRC20 token, named VANY.

"Vanywhere provides a new way for almost anyone to earn cryptocurrency through skill-sharing, which should help onboard a new generation of cryptocurrency users. Typically freelancers incur large fees for the platforms they use, and I think it will be great to see how Vanywhere's solution for reputation and payments disrupt this market."—Patrick Dai, Founder of the Qtum Foundation
